

KISUMA

"The FMECA strategy in Ultimo has helped us achieve significant cost savings. We have also been able to improve safety within the company."

Challenges

- Improving operations and EHS across 4 production lines operating around the clock. Reducing downtime.
- Complying with the Seveso directive
- Setting up a preventive maintenance plan based on FMECA
- Creating a safer working environment

Solutions

- Broad use of EAM solution integrated with different EHS modules to ensure Operations, Maintenance and EHS all work together
- A well thought-out FMECA strategy and its professional registration in Ultimo
- Centralizing asset data. Integration with finance system and data visualisation with BI

Results

- Production, Maintenance and Safety all speak the same language
- Major efficiency gains because of considerable steps in digitisation
- Improved safety & reduced downtime by 40%
- Assets now viewed as a revenue model instead of an expense
